U.S. Patent and Trademark Office PTOL-303 (Rev. 7-05)

Continuation Sheet (PTOL-303)

Application No.

Continuation of 3. NOTE: The proposed limitation that the means to protect against wrapping is rotatable about the shaft portion "during operation" is considered to raise new issues that would require further consideration and search because the Bovi reference is directed to an agricultural implement while applicants claims are directed to a broad gear mechanism and not a gear mechanism in combination with an agricultural implement. Therefore, applicant's amendment would require searching in any area where a protection means could be rotatable about a driven shaft during operation.
